

The National Task Group on Intellectual Disabilities and Dementia Practices is pleased to announce:

Free Webinar. CMEs available.

UPDATES ON BIOMARKERS, THERAPEUTICS, BIOETHICS & DEMENTIA: CONTINUING THE CONVERSATION FOR PEOPLE WITH DOWN SYNDROME

September 30, 2025

5:00 – 6:30 pm ET

Research on biomarkers and anti-amyloid treatments has advanced rapidly since our last NTG webinar in 2021. This updated panel will share the latest findings, practical applications, and ethical considerations across the lifespan for people with Down syndrome who may face Alzheimer's disease. With perspectives from clinicians, researchers, and a bioethicist, the discussion will offer clear guidance for decision-making and care. This session is designed for clinicians, families, providers, advocates, and all who are committed to improving the future of individuals with Down syndrome.

Continuing Education Credit Available

Participants who attend the full duration of this online webinar and complete the required evaluation will be eligible to receive 1.0 American Academy of Family Physicians (AAFP) credits. CEs will be awarded upon successful completion of all participation requirements.

Webinar Faculty:

Lucille Esralew, PhD. (Moderator) - NTG Board Member, Senior Psychologist Supervisor, California Department of Developmental Services (DDS)

Beau Ances, MSc, MD, PhD, FANA, FAAN – Researcher. Neurologist, Professor of Neurology, Radiology, and Biomedical Engineering, Washington University, Saint Louis.

About the NTG

The NTG is a national 501 (c)(3) non-profit organization focused on advocating for the needs of aging adults with intellectual and developmental disabilities who are at risk of or who have been affected by Alzheimer's disease and other forms of dementia. We do this through promoting services and support for individuals with intellectual disabilities impacted by dementia and their caregivers. The NTG produces materials such as practice guidelines and screening tools, provides training and educational resources, offers an online family caregiver support group, and provides technical assistance to organizations and agencies wishing to improve their ability to care for this aging population.
