

Updates on Biomarkers, Therapeutics, Bioethics & Dementia: Continuing the Conversation for People with Down Syndrome

Zoom ◦ October 29, 2024 ◦ 5:00 - 6:30 pm ET (US)

Research in diagnostics and treatment has grown exponentially in the areas of biomarkers and anti-amyloid therapeutics since NTG's last webinar devoted to this topic in October 2021. This panel presentation is intended to be an update, provide practical applications, and reflect on lifespan and ethical considerations for individuals with Down syndrome living with Alzheimer's disease and dementia.

Experts from various settings and reflecting diverse experiences will compose the panel. A bioethicist is included to help navigate and understand the nuances discussed, especially regarding decision-making. As these issues are the subject of continuing discussions, this webinar continues conversations in this area given current research and evidence.

This webinar is useful to clinicians, practitioners, families, providers, advocates, and others invested in the future for persons with Down syndrome and what is transpiring to help those adults living with Alzheimer's disease.

MODERATOR:

Seth Keller, MD

Neurologist, Co-President, National Task Group on Intellectual Disabilities and Dementia Practices

PANELISTS:

Brian Chicoine, MD

Medical Director, Advocate Medical Group Adult Down Syndrome Center, Park Ridge, IL

Margot Rhondeau, MA

Senior Director, Health and Wellness, National Down Syndrome Society, Washington, DC

Beau Ances, MSc, MD, PhD, FANA, FAAN

Neurologist, Professor of Neurology, Radiology, and Biomedical Engineering,
Washington University, Saint Louis, MO

Emily A Largent, JD, PhD, JD, RN

Emanuel & Robert Hart Associate Professor of Medical Ethics & Health Policy
Chief, Division of Medical Ethics
University of Pennsylvania Perelman School of Medicine, Philadelphia, PA

[Registration is required](#). Cost:\$30 (\$25 NTG members; \$10 families/students/pensioners)
